The Bridge indoor

The Bridge

copyright by Lizard Outdoorakademie

Equipped with different materials and a remote-controlled model vehicle the teams construct a bridge.

Success depends on creativity, skill and teamwork.

The construction of the finished bridge must be stable enough to enable crossing with the remote-controlled vehicle without damage.

A real challenge for the entire Team due to the time limits set for the construction. In the end, the team with the most viable concept wins.

We guarantee you an enduring team training with fun and excitement but also team relevant findings.
